Projects

Amachahou — in progress

DevOps · Unity 6, Git LFS, GitHub Actions · 16 people · since Sept. 2026

One repository for the whole team, including artists who are new to Git.

- Designed the feature → develop → main flow, checked on every pull request.
- Workflows that create one branch per task and warn before a scene conflict.
- Git LFS for large files, 9 issue templates and a setup guide.

Portfolio — live

Astro, GitHub Actions, GitHub Pages · 2026

My website, run like a team project.

- CI on every pull request: build, links, image sizes, spelling, Lighthouse.
- Actions pinned by SHA, Dependabot, protected main and one release per version.

Wildline — in progress

Unity, GitHub Actions, itch.io · since May 2026

Personal game in development.

- 9 workflows for the Windows build, Unity tests and publishing to itch.io.

Bobine and Nocturne — published

Firefox extensions, GitHub Actions · 2026

Tracking watched films and series, sorting the news feed on X.

- Every version is signed and published automatically.
